NAVAL SMALL CRAFT INSTRUCTION AND TECHNICAL TRAINING SCHOOL

July 2014

SEVEN NEW COURSES

PATROL CRAFT ADVANCED TRAINING (PCAT) | MASL (P145152)

This course provides international Special Operations Forces, selected conventional forces and police personnel with intermediate to advanced training in the operation of small boats in riverine and littoral environments. PCAT provides students the skills necessary to perform group and individual small craft evolutions.

UAS OPERATIONS AND PLANNING (UASOP) | MASL (P119085)

This course teaches entry-level students the necessary skills and competencies needed to plan and conduct UAS operations with operational safety as the paramount objective. The UASOP course teaches necessary skills and competencies required to operate the Puma AE Digital Data Link (DDL) Small Unmanned Aerial System (SUAS) under supervision and in tactical environments.

INTEL FUSION OPERATIONS AND INTEGRATION (IFOD) | MASL (P121063)

This course provides international Special Operations Forces and civilian equivalent personnel the training needed to effectively fuse and integrate intelligence into operations. This course enables students to anticipate and predict enemy operations, identify and locate enemy forces, and perform intelligence exploitation analysis of personnel and materiel.

JO/NCO LEADERSHIP AND PLANNING (JNPL) | MASL (P121062)

This course is designed for company-level junior officers and senior enlisted personnel. JNPL provides international Special Operations Forces, conventional forces and law enforcement agencies with the knowledge and skills required for the tactical deployment of Special Operations detachments with operational-level mission planning.

SOF TACTICAL PATROL LEADER (STPL) | MASL P124082

This course is designed for company-level junior officers and senior enlisted personnel. STPL provides international Special Operations Forces, selected conventional forces and law enforcement agency students with tailored training in the tactical employment of platoon-sized units in various environments and operational scenarios.

RANGE OPERATIONS SAFETY (ROS) | MASL (P122131)

This course provides international Special Operations Forces, select conventional forces and police personnel the training necessary to effectively manage, train, and employ various types of small arms and ammunition.

EXPEDITIONARY LOGISTICS AND SUPPLY (ELS) | MASL (P152014)

This course provides senior-level Special Operation Forces and supply department personnel the training necessary to effectively manage supply operations for small and medium-sized expeditionary detachments whose mission includes conducting supply management ashore and afloat for expeditionary units and in austere environments.
